

BIT Quiz 4

姓名： [填空题]

学号： [填空题]

第1题： S is total x-ray attenuation along the beam path.Which of the following formulas is correct for calculating S?

[单选题]

正确率： 87.1%

选项	小计	比例
$S=I_0/I$	10	6.45%
$S=\ln(I_0/I)$ (答案)	135	87.1%
$S=I-I_0$	1	0.65%
$S=\ln(I/I_0)$	9	5.81%

第2题： This image is after pre-processing

[单选题]

正确率: 90.32%

选项	小计	比例
对 (答案)	140	90.32%
错	15	9.68%

第3题: The attenuation coefficient of each voxel in CT images, when measured in a specific unit known as the Hounsfield unit, is referred to as the CT number. Therefore, what is the CT number for a water voxel? [单选题]

正确率: 84.52%

选项	小计	比例
-1000HU	10	6.45%
0HU (答案)	131	84.52%
1000HU	12	7.74%
900HU	2	1.29%

第4题： Which steps are included in FBP (Filtered Back Projection) ？ [多选题]

选项	小计	比例
Collect one projection (答案)	132	0%
Take its 1D Fourier transform (答案)	125	0%
Apply ramp filter (答案)	131	0%
Take inverse 1D Fourier transform (答案)	137	0%
Back project the data across image space (答案)	132	0%
Repeat for all projections (答案)	123	0%

第5题： Scan Angle is the coverage angle of the source orbit during scanning. Which of the following options corresponds to the short scan mode? [单选题]

正确率： 83.23%

选项	小计	比例
180 degree	11	7.1%
60 degree + fan angle	14	9.03%
360 degree	1	0.65%
180 degree + fan angle (答案)	129	83.23%

● 180 degree ● 60 degree + fan angle ● 360 degree ● 180 degree + fan angle (答案)
